

MODIFYING THE VIRTUAL CONCERT AT HOME

This year's Sensory Friendly holiday concert celebrates Christmas, Hanukkah, and the winter season through music. The concert will be approximately 50 minutes and include music, speaking, singers, and an appearance from Santa Claus.

Closed captioning is included on the concert video and all activity videos. ASL interpretation is also included for all speaking. To make the concert experience just right for you, try any of these tips:

- Choose if you want to watch the concert video, listen to the music, or both.
- Adjust the lights in the room where you are watching the concert video. Try making the room brighter or darker so you are comfortable.
- Pause the concert video at any time. Take a break and come back to the video when you are ready to continue.
- Replay parts of the concert you like, as many times as you want.
- Fast forward through any parts of the concert you don't want to watch as needed.
- Adjust the volume throughout the concert. If the music is too loud, turn the volume down. If the music is too soft, turn the volume up.
- Respond to the music in your own way – vocalizing, singing, clapping, moving, and dancing are all wonderful responses.
